

I'm Caroline Demeyer and I work in AZ Groeninge Kortrijk for 5 years as pediatric anesthetist. In Kortrijk we have a good range of pediatric surgery such as: congenital hand surgery (general anesthesia combined with locoregional anesthesia), craniosynostosis, intracranial surgery, urological surgery (nephrectomy, pyeloplasty, ureter reimplantations),...

Since the start of my career, I had a great interest in pediatric anesthesia. For this reason I did a fellowship during one year in the child hospital Armand Trousseau in Paris (Professor dr. Isabelle Murat, head of the department). This was a fantastic experience!

Because of my special interest and my experience in pediatric anesthesia, I'd like to be candidate for the board of the BAPA.
